CSR Project

Introduction

Corporate social obligation (CSR) is a type of global personal business self-guideline which expects to add to cultural objectives of a generous, extremist, or magnanimous nature by participating in or supporting chipping in or morally situated rehearses. While once it was feasible to depict CSR as an inside hierarchical arrangement or a corporate ethic procedure, that time has elapsed as different public and worldwide regulations have been created. Different associations have utilized their position to push it past individual or even expansive drives. Conversely, it has been viewed as a type of corporate self-guideline for quite a while, throughout the past ten years or so it has moved significantly from willful choices at the degree of individual associations to obligatory plans at provincial, public, and worldwide levels.

Wipro

Wipro Cares is a **not-for-profit trust that engages with underprivileged community in proximity across education, primary healthcare and ecology**. In addition, the trust also works on long-term rehabilitation of affected communities after natural disasters. What's more, the trust likewise deals with long haul restoration of impacted networks after cataclysmic events. The center regions and the extent of work are:

- Education for underprivileged children: Support direct way access to educational opportunities for underprivileged children.
- Education for Children with disability: Supports the educational and rehabilitative needs of underprivileged children with disabilities.
- Primary healthcare: Work with partners in the delivery of good quality health care services to underprivileged communities around our locations and in remote underserved areas where health care access has been weak or non-existent till now. Also build the capacity of local community in managing their health needs, of augmenting government infrastructure and in training health workers to address the unique needs of the communities.
- Community Ecology: Work on Environment projects that have direct benefit for underprivileged communities. Our projects span across the following areas (a) Waste Management (b) Agro forestry (c) Water conservation and (d) Biodiversity parks
- Disaster Rehabilitation: Work on long term rehabilitation of the affected communities after a natural disaster

Wipro CSR 2020-21 - Key expenditure

Education

The difficulties emerging out of our schooling system are complex.

These reach from high dropout rates, unfortunate learning-levels, disparity in admittance to quality schooling, high commonness of repetition learning, marks direction, absence of responsibility, and deficient educator readiness. These issues are fundamental in nature and require conscious, long haul, and supported wanting to fabricate limits and make public mindfulness and commitment.

We fabricate the limits of significant entertainers in the school system to achieve the ideal change. We solidly accept that training is an empowering agent of social change. We imagine a majority rule government where each resident is enabled, in a singular limit as well as in the morals of value, the centrality of variety, the ethos of equity, and is in this way determined by friendly responsiveness. Schools are the spaces that sustain these standards, abilities, and values.

Our idea of well-rounded schooling guarantees the comprehensive improvement of the youngster in numerous aspects to realize and extend their true capacity, as they become dynamic, contributing, and concerned residents of the world. Such numerous components of improvement incorporate mental, social, close to home, physical, and moral capacities. Figuring out how to-learn, decisive reasoning, critical thinking, calculated understanding, and so forth, are a portion of the other significant features of an excellent schooling system.

School Education

- Supported 132 organizations working towards systemic reforms in school education through 198 educational projects and initiatives across 29 states
- Supported 16 new organizations in FY20. Cumulatively, 88 organizations supported towards our goal of 100 organizations by FY20; 60 under Seeding program and 28 under Grants program.
- 4 Regional Partner's Meets organized with participation from X participants

Nearly 42,000 children from underprivileged communities benefited from our 22 education projects in 8 states through our community program

- Education for Children with Disability program supports the educational and rehabilitative needs of over 7,200 underprivileged children with disabilities, through 16 projects in 6 states.
- Disaster Rehabilitation: Work on long term rehabilitation of the affected communities after a natural disaster

Analysis of the Education

Wipro Ltd reaches more than 40 thousand children through Education for Underprivileged Children Programme across 8 states in the country. The average net profit of the company for the last three financial years was Rs 8802.2 crore and the prescribed CSR expenditure (2% of the net profit) was Rs 176.1 crore. Company spent the total of Rs 185.3 crore on Corporate Social Responsibility (CSR) in FY 2018-19, out of which Rs 11.558 crore were spent on education for underprivileged children.

Wipro Cares focuses on meeting the educational needs of the urban poor along With other initiatives. The educational needs of children that belong to this group are often neglected due to various reasons. Wipro Cares aims at helping these children by offering them opportunities for holistic educational and social development by running bridge schools, non- formal schools and giving them vocational training. Wipro also helps train teachers to engage with these children, with empathy. In addition, they support a school for hearing impaired children and encourage girl child education.

- Magic bus, Bengaluru: The Magic Bus project started in October 2013 and is working with 500 children around the Sarjapur area in Bangalore. Sensitization of around 500 children in and around the Sarjapur area on the importance of education, gender issues and health hygiene is being carried out and also 20 youth leaders from the community were be trained and assisted to take up leadership roles in the community.
- Every child counts campaign, Pune: The Key goal of the Campaign is to reach and enroll all children in the age group of 6-7 into mainstream schools. With the support of Wipro Cares ECC would be extending the campaign to five areas in the outer developing Area of Pune.Door Step School, an NGO working for the education of children of marginalized communities at construction sites and roadside dwellings for more than 2 decades foresaw the alarming trend of large numbers of children who were out of school.

Health Care

The Indian healthcare scenario presents a spectrum of contrasting landscapes. At one end of the spectrum are the glitzy steel and glass structures delivering high-tech medicare to the well-heeled, mostly urban Indian. At the other end are the ramshackle outposts in the remote reaches of the “other India” trying desperately to live up to their identity as health subcenters, waiting to be transformed into shrines of health and wellness, a story which we will wait to see unfold. With the rapid pace of change, this spectrum will likely widen further, presenting even more complexity in the future. Poor access to standardized primary healthcare services has always been a significant issue in Tier 2 & Tier 3 cities of India. The situation continues to be distressing, especially in the villages and rural areas. On the other hand, increased migration in cities has burdened public healthcare facilities — sanitation and primary healthcare facilities are

often inadequate. Some common issues disadvantaged communities face are the lack of healthcare awareness, poor sanitation and hygiene practices, and insufficient access to primary healthcare facilities. Through community initiatives, we aim to address the accessibility and availability issues related to direct healthcare services, including maternal and child health, adolescent health, nutrition, community health, hygiene, and sanitation. In the covid-19, urban areas also suffer and face problems delivering healthcare facilities. Wipro did many things to improve healthcare facilities in Tier 2 & 3 cities of India and helped its employees and society in the covid-19 by providing healthcare facilities.

- We build the local community's capacity to manage their own healthcare needs in partnership with nonprofits and support regular healthcare service delivery in preventive and curative healthcare.
- At first, community healthcare projects providing quality primary healthcare services were initiated in Aurangabad's rural villages, where healthcare access was weak or non-existent. Over the last few years, our interventions have expanded to other rural areas such as Amalner, Hindupur, Sriperumbudur, Baddi, Haridwar, Devanahalli, etc. We are currently focusing on increasing our community healthcare interventions in urban slum areas of major cities like Mumbai, Pune, Delhi, and Kolkata.
- Amalner Health Care Project - The project commenced in the year 2012. The Wipro Consumer Care & Lighting Group (WCCLG) plant is in Amalner. Amalner is a drought-prone area, and merely 3% of the land is fertile. Five villages selected for this project didn't have the necessary and adequate health care infrastructure. Wipro aims to provide and increase awareness about existing and new healthcare facilities through this project.
- In the covid-19, Wipro helped by identifying vulnerable individuals/communities such as daily wage earners, migrant workers, and waste pickers, especially those who do not have access to social security or government schemes. They funded about 250 NGOs, working in 349 districts across 22 states to provide food and sanitation kits to the most disadvantaged.
- They supported NGOs to help strengthen healthcare infrastructure and delivery in districts. E.g., in setting up isolation wards, supply of consumables packages (PPE kits, N95 mask, Hand sanitizers, Liquid soap), etc.
- They also supported their employees by arranging vacant beds in case of need, providing medicines and oxygen cylinders, and providing vaccination doses free of cost.

Analysis of the Health Care

Wipro works with partners who provide quality primary health care services to extremely disadvantaged communities in Nagaland, West Bengal, Karnataka, Delhi and Maharashtra. Through their projects they address the issues related to maternal and child health, adolescent

health, nutrition, community hygiene and sanitation, preventive and curative care, health education & counseling. With the onslaught of COVID-19 pandemic, they recalibrated their work of their existing healthcare projects by integrating COVID-19 care along with the key primary healthcare interventions.

Over 1,30,000 people from disadvantaged communities have access to primary healthcare through 10 healthcare projects across 5 states in FY21.

396,000 PPE kits and N95 masks distributed across 8 states.

500+ non-profit partners involved in delivering humanitarian and healthcare aid.

In April 2020, Wipro committed 1,000 million towards tackling the unprecedented health and humanitarian crisis arising from the COVID-19 pandemic outbreak and out of that an amount of 868 million was spent. Wipro's Covid response involved working closely with around 100 non-government organizations (NGOs) who were engaged directly on the ground in supporting affected communities.

Converting its Pune IT facility to a fully equipped and staffed 450 bed Covid hospital. The hospital has established a solid reputation with the surrounding communities and has seen nearly 5,500 admissions till date. Designing and running a digital platform for doctors and healthcare experts to exchange and collaborate on emerging good practices in Covid care – the Global Coalition for COVID-19 Medical Care (GCCMC). The platform has been very active with a number of webinars and interactive sessions organized on COVID-19 control and vaccination.

Average net profit of the company as per section 135(5) (calculated for 3 preceding financial years i.e. FY 2017-18,

FY 2018-19 and FY 2019-20): 82,817 Million

a) Two percent of average net profits of the company as per section 135(5): 1,656 Million

b) Surplus arising out of the CSR projects or programs or activities of the previous financial years: NIL

c) Amount required to be set off for the financial year 2020-21, if any: NIL

d) Total CSR obligation for the financial year 2020-21: 1,656 Million

CSR amount spent or unspent for the financial year 2020-21:

a) Amount spent in Administrative Overheads: 42 Million

b) Amount spent on Impact Assessment, if applicable: Not Applicable

c) Total amount spent for the Financial Year 2020-21: 2,512 Million

d) Excess amount for set off, if any: 856 Million

Ecology Sustainability

The cornerstone of corporate social responsibility that is built in protecting mother nature is ecology. It is the lynchpin of corporate social responsibility that is based on preserving mother nature. A company can guarantee that it leaves the environment in a better state than when it arrived by running its business as efficiently as possible and supporting relevant causes.

- Businesses frequently engage in environmental stewardship through reducing waste, pollution, the consumption of natural resources, and emissions while producing goods.
- The company recycles materials and products on a general basis and encourages clients to do the same.
- Compensating for unfavorable effects by restoring natural resources or offering assistance to individuals who can help the company's impact be reduced.
- Adopting distribution strategies that cause the fewest emissions and contaminants to be emitted.
- The creation of product lines that support these ideas.

Wipro's Approach

Wipro acknowledges that today's environmental problems are just as important as the world's economic needs. Consequently, ecological sustainability is a key component of the strategy for responsible corporate citizenship. Wipro refers to the concept of "Natural capital" that refers to the

idea that nature provides enormous value that is essential to human existence and that any activity that depletes natural capital is detrimental to our society.

Wipro's approach to Natural Capital embraces the continuum of:

- Initiatives 'within the organization' that focus on reducing the energy, water, waste and biodiversity footprint of our business operations; and
- Engaging through partners on key external programs in community ecology.

Wipro is deeply committed to ecological sustainability, and as a result, the company has participated in numerous environmental activities both inside and outside of our corporate ecosystem. The sustainability programme, often known as eco-eye, was established in 2008. Their programme is built on the four pillars: Biodiversity, Responsible Water, Waste and Pollution Management, and Carbon Mitigation and Energy Efficiency.

Analysis - Performance Against Ecological Goals

Wipro is a member of the Dow Jones Sustainability Index and the NASDAQ Global Sustainability Index, and it was ranked first in the 2010 Asian Sustainability Rating (ASR) of Indian enterprises. As of November Greenpeace gave Wipro a score of 7.1/10 in 2012, placing them first.

Starting from nothing, Wipro's use of renewable energy has slowly increased to 100 million units today, accounting for more than 25% of their total energy consumption. Over the last five years alone, Wipro's efforts in green buildings have resulted in savings of more than 100 million units of power. Additionally, they have made considerable investments in their company's water efficiency and conservation programmes.

Disaster Response

The hindered segments of society are the most impacted during disasters.

Regular calamities, pandemics, and social disturbance are a sad unavoidable truth, particularly in a climatically, geographically, and ethnically different nation like India. The distraught segments of society are the most impacted during these disasters as their jobs' now delicate nature gets upset further.

Throughout the long term, we have taken part in a few transient help helps and long haul restoration projects with networks influenced by calamities. Before, we have rebuilt the existences of individuals impacted by Karnataka Floods, Bihar Floods, Odisha Floods, the Japan Tidal wave, Typhoon Sandy, and the Philippines Tornado, and so forth.

In view of our evaluation of the fiasco, we choose to help the impacted networks through alleviation help or recovery support, or both.

The help is given following the calamity, while a definite evaluation is led for a drawn out restoration project. The point is to empower the impacted networks to reestablish their jobs and remain versatile against future catastrophes, particularly in cataclysmic event inclined regions.

The idea of commitment changes relying upon various settings, like the area's geology, culture, and bigger financial real factors.

To actually execute projects in our picked areas of work, we mean to collaborate with solid associations that follow the rules referenced underneath:

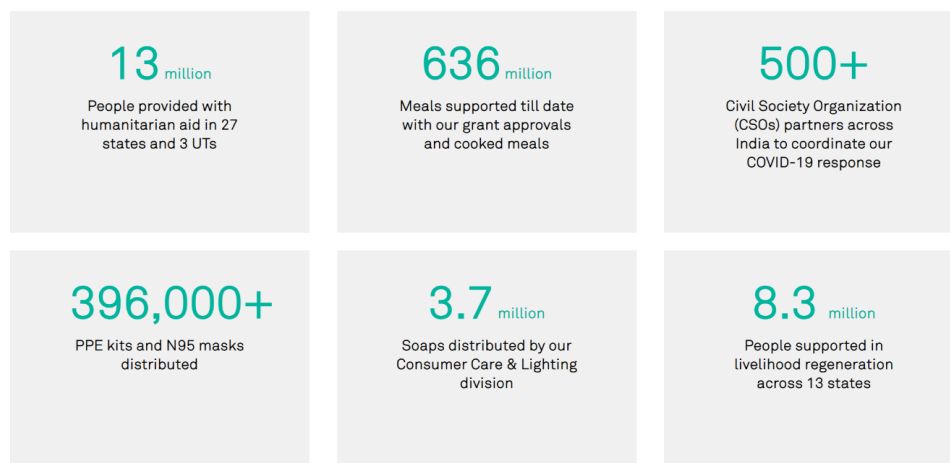

Ought to be an enlisted non-benefit association, meeting legal commitments, for example, 80G, 12A, alongside at least 3 years of work insight in the field of catastrophe response
Should have space mastery in the field of calamity reaction with a demonstrated track record
Should contain areas of strength for a group with more than adequate involvement with the field of calamity response
Should be know all about the neighborhood setting with on-ground tasks and a solid local area presence
Should show an eagerness to draw in with significant partners to benefit the affected community
The venture ought to be centered around engaging the local area to make economical models once the undertaking is removed.

Public Spaces in Urban communities and Networks' turned into a piece of our CSR commitment in 2018. Encouraging comprehensive public spaces in our urban communities like space for expressions, sports, theater, and so on, that are intended to be open to the general population at large.

Response to Covid 19 disaster

Integrated Response

Leveraging the network of Azim Premji Foundation, Wipro Limited, and Wipro Enterprises Limited (WEL) for COVID-19 response.
